Subject: Microsoft Settlement

I am opposed to the proposed Microsoft settlement because will not adequately punish them for their anti-competitive behavior nor will it keep them from continuing to stampede over competitors through anti-competitive, not to mention illegal, strategies. Our own federal courts found the guilty. Adding to the proliferation of the Windows operating system by giving Microsoft access to countless school computers doesn't seem like punishment to me. Please find an appropriate punitive response.

Thank you,

Gary McDaniel
